

RABIA NUR AKDAŞ

ABOUT ME

I am a Computer Engineering graduate who is eager to learn, responsible, and committed to continuous self-improvement. I have experience in software development using C#, Python, Dart, and JavaScript, as well as developing projects with Flutter, ASP.NET Core, and React. Through various projects, I have gained hands-on experience in mobile application development, backend development, database management, and artificial intelligence, while contributing to different stages of the software development lifecycle. With strong analytical thinking and problem-solving skills, I am motivated to develop innovative solutions and continuously expand my technical expertise in the ever-evolving field of software engineering.

EXPERIENCE

Software Engineering Intern — FERISOFT SOFTWARE, Istanbul

February 2026 – June 2026

- Developing and maintaining Flutter-based mobile application modules.
- Integrating REST API endpoints and managing JSON-based data structures.
- Implementing UI screens, forms, and detail pages using Flutter and GetX.
- Supporting backend-mobile integration processes and debugging API responses.
- Improving user interface layouts and application usability.
- Using Git for version control and collaborative development workflows.

Volunteer Intern — Hedef Bilişim Teknolojileri, Istanbul

October 2025 – December 2025

- Developed an artificial intelligence model using Python as part of applied machine learning studies.
- Worked on data preprocessing, model training, and performance evaluation processes.

PROJECTS

Turkish Sentiment Analysis Chat Application (2025)

Technologies: React, React Native, .NET Core API, Hugging Face Python AI, SQLite

- Developed a chat application where messages are analyzed instantly using AI-based sentiment analysis.

English Flashcard Mobile Application (Flutter) (2024)

Technologies: Flutter, Dart, SQLite

- Developed a mobile application that allows users to create flashcards for learning English vocabulary.

Autonomous Vehicle Traffic Sign Recognition Project (2025)

Technologies: Python, Computer Vision

- Developed an autonomous vehicle capable of detecting traffic signs and responding according to detected signals.

Book Purchasing Web Application (2024)

Technologies: ASP.NET 8, Entity Framework Core, SQL Server

- Developed a web application where users can browse books, add them to cart, and complete purchasing processes.

Petshop Web Application (2023)

Technologies: HTML, CSS, JavaScript

- Developed a dynamic web application featuring user registration, login, and cart functionalities.

BlogApp – Mobile Blog Application (2026)

Technologies: Flutter, Dart, Laravel, PHP, MySQL, REST API

- Developed a full-stack mobile blog application using Flutter and Laravel REST API.
- Implemented user authentication, post and comment management, and like functionality.
- Integrated the Flutter application with the backend using REST API

TECHNICAL SKILLS

Languages

Dart, C#, Python, JavaScript, PHP

Frameworks

Flutter, ASP.NET Core, React, React Native, Entity Framework Core, Laravel

Databases

SQLite, SQL Server

Tools

Git, Postman, Android Studio, VS Code

Concepts

REST API Integration, Mobile UI Development, State Management (GetX), JSON Data Handling

EDUCATION

Topkapı University

Computer Engineering

September 2022 – June 2026

GPA: 2.81 / 4.00
