

Rabia Nur Akdaş

ABOUT ME

I am a responsible and growth-oriented Computer Engineering graduate with software development experience in C#, Python, Dart, and JavaScript. I have built projects using Flutter, ASP.NET Core, and React, gaining hands-on experience in mobile application development, backend development, database management, and artificial intelligence. By contributing to different stages of the software development lifecycle, I strengthened my analytical thinking and problem-solving skills. I aim to continuously expand my technical knowledge and build effective, innovative solutions.

EXPERIENCE

Software Engineering Intern — Ferisoft Software, Istanbul

February 2026 – June 2026

- Contributed to the development and maintenance of Flutter-based mobile application modules.
- Integrated REST APIs and managed JSON-based data structures.
- Developed user interfaces, forms, and detail pages using Flutter and GetX.
- Supported backend–mobile application integration and analyzed API errors.
- Improved the application's user interface and overall usability.
- Used Git for version control and contributed to collaborative development workflows.

Volunteer Intern — Hedef Information Technologies, Istanbul

October 2025 – December 2025

- Developed a machine learning-based AI model using Python.
- Worked on data preprocessing, model training, and performance evaluation.

PROJECTS

Restaurant Management System – Full-Stack Web Application (2026)

Technologies: C#, ASP.NET Core Web API, React, TypeScript, Entity Framework Core, SQL Server, JWT

- Developed a full-stack application with role-based authorization for managing restaurants, branches, tables, products, orders, and payments, including a dashboard and PDF receipt generation.

Turkish Sentiment Analysis Chat Application (2025)

Technologies: React, React Native, .NET Core API, Hugging Face, Python AI, SQLite

- Developed a chat application that uses AI-powered sentiment analysis to analyze user messages in real time.

English Vocabulary Flashcards Mobile Application (Flutter) (2024)

Technologies: Flutter, Dart, SQLite

- Developed a mobile application that allows users to create personalized flashcards for learning English vocabulary.

Autonomous Vehicle Traffic Sign Recognition Project (2025)

Technologies: Python, Computer Vision

- Developed an autonomous vehicle capable of detecting traffic signs and responding according to the identified sign.

Online Bookstore Web Application (2024)

Technologies: ASP.NET 8, Entity Framework Core, SQL Server

- Developed a web application that allows users to browse books, add them to a shopping cart, and complete purchases.

Pet Shop Web Application (2023)

Technologies: HTML, CSS, JavaScript

- Developed a dynamic web application featuring user registration, login, and shopping cart functionality.

TECHNICAL SKILLS

Programming Languages

Dart, C#, Python, JavaScript, PHP

Frameworks

Flutter, ASP.NET Core, React, React Native, Entity Framework Core, Laravel

Databases

SQLite, SQL Server

Tools

Git, Postman, Android Studio, VS Code

Concepts

REST API Integration, Mobile UI Development, State Management (GetX), JSON Data Handling

EDUCATION

Istanbul Topkapi University

Computer Engineering |
September 2022 – June 2026

GPA: 2.81 / 4.00
